Languages

English,Tamil,Arabic

Skills

- HTML5 and CSS3 Concepts
- Bootstrap Front-end Framework
- Core Knowledge in Javascript and ReactJS Concept
- Java Language (OOPS Concept)
- PostgreSQL Concept and MySQL WorkBench
- Enhancing Web development Skills through Udemy
- Git and Github Commands
- Knowledge On Amazon Web Service(AWS)

Experience

Software Developer Intern – Bevywise Networks (3 Months)

- Worked on developing and enhancing chatbot applications for real-time use cases.
- Implemented conversational logic and UI features using JavaScript.
- Gained hands-on experience in debugging, testing, and improving application performance.

Project

Voice Assistant (May-2024)

--Developed a voice assistant application using Java that processes user voice commands to perform tasks like opening applications.

Car Damage Detection and Cost Estimation (Mar-2025)

--Developed a car damage detection and cost estimation system using Python. The model analyzes vehicle images to identify damaged areas and predicts repair costs based on a labeled dataset.

D-Bot Application Using API (Aug-2025)

--Developed a d-Bot ReactJS-based chatbot application that integrates with APIs to generate dynamic responses.

Courses

- Certificate of completion in ReactJS Library in Dhatchan Academy.
- Certificate of completion in Front-End Development HTML in Great Learning.
- Certificate of completion in Basic Python in Machine Learing in Great Learning.
- Certificate of completion in Front-End Development CSS in Great Learning.
- Certificate of completion in NDG Linux Essentials in Cisco Networking Academy.
